

It is with great pleasure to announce the forthcoming conference

The 9th Visegrad Conference on Dynamical Systems, Prague 2021

14 – 18 June

<https://mat.fsv.cvut.cz/ds21>

Because of the still existing unstable situation with Covid-19, we have decided to organize it as an *online conference*. The conference will be held during the week of 14 – 18 of June.

We assume:

- to use Zoom
- to organize our conference without any conference fees/payments (only supported by the Czech Technical University in Prague)
- to provide about 12 main one hour lectures, 16 contributed talks, accepted posters will be exhibited during the conference

Topics: low dimensional dynamical systems and entropy

The aim of the conference is to provide an opportunity for mathematicians from all over the world to present results of their research, to promote existing collaboration and also to encourage new collaboration. Special attention will be paid to the participation of young researchers and also students, their input being especially appreciated.

Details of registration for the conference will be provided in our next announcement disseminated at the beginning of April.

On behalf of the organizing committee,

Jozef Bobok
